Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 7-10 and 13-21 are rejected under 35 U.S.C. 102(b) as being anticipated by the Kupferle Foundry Company Publication (Valve Flushing Model No. 77). Note this device is housed in a lockable enclosure with perforation at the bottom thereof to diffuse flushing water. The flushing unit is attached to and supported by the hydrant with a brass swivel collar for attaching a hose thereto, if desired. The enclosure has an automatic flushing valve that is controlled by a controller and timer mechanism.

Claims 1-6, 8-9, 13-14 and 20-21 are rejected under 35 U.S.C. 102(b) as being anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over McCarty. A water municipal system is readable on water or fire hydrant, elements 11 and 16. The portion of element 16 below element 15 is readable on the hydrant inlet positioned below ground. The lockable box is readable on element 10 Element 27 is readable on the programmable timer, element 26 is readable on the automatic control and elements 20, 21, 22, 25 and 28 are readable on the manual operable devices for setting at least one of time of operation and duration of operation (see column 4, lines 44-67 and column 5, lines 1-18). The control battery is readable on element 30. The automatic control valve is readable on element 17. The nipple is readable on the outlet of element 17 that the hose 18 is secured to. Note that in the alternative, it is obvious to one of ordinary skill in the art, at the time the invention was made, to have the outlet of valve 17 threaded to the outlet pipe or hose 18, which is well known in the art. Whether it is mounted to the nipple or outlet internally of

the box or externally of the box is merely an obvious design expedient to one of ordinary skill in the art, at the time the invention was made.

Allowable Subject Matter

Claims 11-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
